SUMMARY

Results-driven Computer Science graduate (B.Tech 2026) with 1+ year of production backend engineering experience across Django, Go/Gin, REST APIs, PostgreSQL, and Redis. Proven ability to design scalable microservices, implement secure authentication systems, and ship AI/LLM-powered applications in fast-paced environments. SIH 2024 Finalist, Codeforces Specialist, and CodeChef 4-Star with 1,000+ problems solved. Open to Software Development Engineer (SDE), Backend Engineer, and AI Engineer opportunities.

EDUCATION

B.Tech in Computer Science — Dr. APJ Abdul Kalam Technical University

Ghaziabad, India | 2022 – 2026

EXPERIENCE

Backend Intern — Scopex

Remote | Jan 2026 – Present

- Built Django Admin panels across 3 modules to manage users, KYC, wallets, pay-ins, payouts, and transaction flows on PostgreSQL, serving 500+ internal users and reducing operational turnaround time by ~40%.
- Integrated custom admin actions and REST APIs (payout initiation, status tracking) supporting 8+ API endpoints with <200ms avg response time, using inline models, overridden views, and Redis caching.
- Contributing to Golang-based microservices across 4+ services handling 10,000+ daily transactions, managing core business logic and inter-service communication in a distributed, scalable architecture.

Member of Technical Staff (Intern) — GeeksforGeeks

Noida | Oct 2025 – Dec 2025

- Designed and published 50+ curated DSA and Competitive Programming problems on the GeeksforGeeks platform, reaching 5,000+ learners.
- Co-authored 10+ high-quality algorithm and data structure articles with a 14-member content team, boosting platform engagement and content coverage.

Software Development Intern — Quizy

Gurgaon | Apr 2025 – Jun 2025

- Developed 15+ REST APIs with Django REST Framework and PostgreSQL; collaborated with a 12-member team to ship production-ready, scalable backend services.
- Implemented authentication, input validation, and error-handling middleware across 15+ endpoints; wrote unit tests achieving ~85% coverage and reducing bug turnaround time by ~30%.

PROJECTS

Admin Dashboard with Role-Based Access Control

Python | Django | JavaScript | PostgreSQL | Redis | SQLite

- Architected a full-featured Django admin dashboard with granular RBAC used by 3 role types and 20+ internal team members; integrated Redis session caching to cut dashboard load times by ~35%.
- Built user management, project tracking, task assignment, analytics, and reporting modules across 5 core modules on PostgreSQL, eliminating significant manual overhead for internal ops teams.

Restaurant Management System

Go | Gin | MongoDB | JWT | Redis

- Production-ready backend with MVC architecture handling 5+ concurrent user roles; JWT auth (access + refresh tokens), RBAC via Gin middleware, and Redis token blacklisting for 1,000+ session requests.
- Designed 20+ RESTful endpoints for menus, orders, tables, and invoices with auto-calculated billing, MongoDB persistence, and Redis caching for high-frequency reads.

AI Tone Adaptation System

LangGraph | FastAPI | FAISS | PostgreSQL | SQLite

- FastAPI AI system supporting 5+ distinct tone profiles with <500ms inference latency; adapts response tone using user profile context, real-time emotion detection, and a multi-layer memory architecture on PostgreSQL.
- FAISS vector store indexes 10,000+ memory vectors enabling sub-100ms semantic retrieval for personalized, context-aware interactions; supports memory analytics and feedback-based tone calibration.

TECHNICAL SKILLS

Languages	Go (Golang), Python, C, C++, JavaScript, HTML, CSS
Frameworks	Django, Django REST Framework, FastAPI, Gin, TensorFlow
AI / ML	LangGraph, LangChain, LlamaIndex, OpenAI API, FAISS
Databases	PostgreSQL, MySQL, MongoDB, Redis, SQLite, FAISS (vector store)
CS Fundamentals	Data Structures, Algorithms, OOP, System Design, OS Concepts
Tools & Cloud	Git, GitHub, VS Code, Postman, Docker, AWS, GCP

ACHIEVEMENTS

Codeforces Specialist — Rating 1513

CodeChef 4-Star — Rating 1817

LeetCode Rating 1769

- Smart India Hackathon (SIH) 2024 Finalist** — Among top teams nationally in India's largest government hackathon; built an AI-based solution for a real-world problem statement.
- Multiple Hackathon Winner** — Won 2+ college-level and inter-college hackathons out of 5+ competitions; recognized for rapid prototyping, full-stack delivery, and technical pitching under deadlines.
- Top 100 rank** in multiple Codeforces and CodeChef rated contests across Div. 2 and Div. 3 rounds; consistently finished in the top percentile with peak contest rank under 100.
- Solved **1,000+ Data Structures and Algorithms problems** across LeetCode, Codeforces, and CodeChef — dynamic programming, graphs, trees, binary search, and greedy techniques.
